SWI Quality Management System passes CANPAC quality audit

Toronto, August 22, 2008 – Systemware Innovation (SWI) has successfully passed an audit of the SWI Quality Management System (SQMS™) against the CSA Z299.2-85, CSA N286.2-00 and N286.7-99 quality assurance standards. The CANDU® Procurement Audit Committee (CANPAC), an independent division of the CANDU Owner's Group (COG), conducted the audit over the week of May 12th to 16th. It covered all aspects of SQMS as well as numerous nuclear projects recently completed by SWI. The audit is a prerequisite for continued placement on the COG-member nuclear utilities' approved suppliers list and is repeated every three years.

Jeff McDougall, VP Professional Services, remarked, "We're happy to have once again successfully completed the CANPAC audit process. The credit goes to our excellent staff of professionals and their dedication to delivering solutions of the highest quality." CEO David Tremaine added, "Our success over the last 30 years is due in large part to the early adoption of, and unwavering commitment to, a strong quality assurance program."

The CANDU Owner's Group provides a forum for the exchange of information related to the support, development, operation, maintenance, and economics of CANDU technology. It is currently made up of Bruce Power, Hydro Quebec, New Brunswick Power, Ontario Power Generation, and Atomic Energy of Canada Limited, as well as six offshore CANDU operators.

SWI has been providing technology solutions to the energy sector since 1980. During this time, SWI has been a key contributor to the success of numerous major nuclear energy projects. SWI consultants work both as attached staff, complementing the clients' project teams, and on solutions managed at SWI facilities.

CANDU® is a registered trademark of Atomic Energy of Canada Limited.
