Halcyon Monitoring Solutions and SWI Form Strategic Partnership

Toronto, MAY 11, 2009 – Halcyon Monitoring Solutions and SWI are proud to announce the formation of a strategic partnership. Under this agreement, SWI becomes an authorized reseller of Halcyon’s infrastructure management solutions. The partnership also extends Halcyon’s professional services capability by providing access to SWI’s large team of skilled consultants.

Margot Loren, CEO of Halcyon, stated, “We are enthusiastic about SWI becoming an authorized reseller of Halcyon Solutions. This collaboration presents compelling value to our customers and formally establishes our collective strengths and wealth of mission critical experience, business domain knowledge, technology expertise, and infrastructure management solutions.”

Halcyon’s infrastructure management solutions provide operational visibility, availability, and reliability for business critical services and their underlying infrastructure. Their complete end-to-end monitoring solutions are straightforward to deploy and use. These cost-effective solutions enable organizations to reduce downtime of the integral components in their datacenter. Through proactive monitoring and early problem detection, business services can be optimized, while outages can be minimized to achieve high system availability. Since 1994, Halcyon solutions have been adopted by numerous Fortune 100 companies and SMEs, spanning every major geography and sector.

“We are very excited to be formally associated with Halcyon’s excellent product line. For over 15 years, SWI has used Halcyon’s infrastructure management solutions as key components in the critical applications we build for our clients,” remarked SWI CEO David Tremaine.

SWI has been providing innovative technology solutions to a wide range of industry sectors since 1978. During this time, SWI has been a key contributor to the success of over 500 projects, including many within the energy, financial and transportation industries. SWI provides skilled consulting services spanning the entire system, software and hardware engineering lifecycles. SWI also creates custom turnkey solutions from system specification through to delivery and support.
